

Plumping

innovative texture in emulgel

cosmico
— COSMETICS —

Immerse yourself in the world of timeless beauty with our exclusive "Plumping" cosmetics line. This collection represents the culmination of scientific innovation and natural care, created to deliver extraordinary results. At the heart of every product in our line, you will find a powerful combination of peptides and emulgel technology, designed to give your skin an exceptional plumping effect.

Peptides, known for their regenerating and anti-aging properties, are the secret to our advanced formulation. In synergy with the light and refreshing texture of the emulgel, they penetrate deeply into the skin to stimulate the production of collagen and elastin, visibly improving skin firmness and elasticity.

Emulgel technology, with its unique consistency that combines the benefits of emulsions and gels, ensures rapid absorption and a feeling of unparalleled comfort. This allows the active ingredients to act effectively, giving the skin a three-dimensional luminosity and hydration.

Let the "Plumping" line revolutionize your daily beauty routine, transforming it into a ritual of luxury and well-being. Embrace the radiance, youth and health your skin deserves. With "Plumping", beauty is not just a goal, but a tangible reality. Discover the secret of regenerated and plump skin with our exclusive treatments, designed to give you an unparalleled sensorial experience and results that will make you feel splendid every day.

Agè

Emulgel Anti-aging Chrono Aging, for mature skin

Discover a perfect blend of nutrients for your skin, enclosed in a light and refreshing texture. Our advanced formula includes new type I collagen peptides, obtained from sustainable plant sources, which visibly reduce the length and depth of wrinkles. Fermented elastin stimulates the production of natural collagen and activates the skin's antioxidant genes, contributing to a youthful and healthy appearance.

Thanks to the presence of four types of hyaluronic acid, the skin appears visibly firmed, luminous and hydrated in a three-dimensional way. The sodium hyaluronate complex forms a protective barrier on the surface of the skin, reducing transepidermal moisture loss. This essential ingredient retains moisture on the skin's surface, improving the health of the corneum. Additionally, acetylated sodium hyaluronate penetrates the stratum corneum to hydrate and repair damaged tissue, while hydrolyzed sodium hyaluronate works quickly to restore skin from the inside out.

Our formula is enriched with natural vegetable oils of Canola, Helianthus annuus, Meadowfoam, Rosehip and Argan, which deeply nourish the skin. Panthenol adds a feeling of calm and promotes healing of the skin, leaving it soft and supple.

Balance Cream

Natural ingredients for one Bright and Healthy Skin

Our exclusive and advanced formula is enriched with a meticulous selection of natural ingredients, carefully chosen to give your skin a luminous, radiant appearance full of vitality.

The powerful antioxidants contained in this emulgel actively work to strengthen the skin's natural protection, acting as an effective shield against the aggressive agents that the skin faces every day. This active defense helps not only to preserve the youth of the skin over time, but also to visibly improve its appearance.

Carefully selected ingredients promote the rebalancing of the skin microbiota, creating an optimal environment that supports the health and vitality of your skin. This balance is essential for radiant and energized skin.

But the qualities of this cream don't end there: the exclusive illuminating particles integrated into the formula give a touch of instant luminosity. From the first use, your skin will appear visibly more radiant, fresh and luminous, guaranteeing a result that can be seen and felt.

Elasthase Cream

Anti-aging emulgel for smoothing,
tone and firm the skin

Elastase face cream represents an advanced treatment designed to smooth, nourish and effectively combat the signs of skin aging.

Thanks to its innovative formula, it accelerates cell renewal, revitalizing the skin from the inside. The carefully selected ingredients not only tone the skin, but also help to visibly reduce wrinkles, giving a younger and more radiant appearance.

The rich and silky texture of Elastase delicately melts into the skin, ensuring a pleasant and comfortable application. Enriched with a fruity scent that delights the senses, this cream transforms your skincare routine into a moment of pure pleasure and well-being, every day."

This expanded and improved version of the text emphasizes the benefits of Elastase cream in a more detailed and engaging way, using language that entices and describes the sensory experience of using the product.
