PIGMENT COLOR CHART

PMU-line's PIGMENTS, A QUALITY GUARANTEE

To create its sterile pigments, PMU-line uses only extremely pure raw materials composed of mineral and organic pigments.

Selected for their high tinting strength, they offer an ideal chromatic stability and a dispersion suited to the skin's pH, without the addition of preservatives.

PIGMENT COLOR CHART

MULTIPLE USE STERILE PIGMENT- MANUFACTURED IN MEDICAL LABORATORY IN EU - SINCE 1999

Manufactured in EU in a controlled atmosphere in certified laboratory ISO 9001, EN13485 and GMP, PMU-line pigments are the result of a precise blend of organic and mineral pigments, which are subject to rigorous controls: analysis of heavy metals and aromatic amines. They are in perfect conformity with the recommendations of European legislation, one of the most rigorous in the world. PMU-line pigment is easy to use thanks to an ultra-precise pump and remains sterile between each use. Without preservatives, water or petrochemical products, PMU-line pigments are adapted to the skin's pH.

EYEBROWS

Soft Hairstrokes & Ombre

Perfect Brown 1 EB4310

- Dark brown with a neutral undertone
- For dark brown hair, lightened hair
- Heals in a light ashbrown tone on pale skin

Perfect Brown 2 EB4510

- Medium brown with a neutral undertone
- For light and dark brown hair, lightened hair
- Heals in a soft brown tone on pale skin

Perfect Brown 3 EB4210

- Dark brown with a neutral undertone
- For dark brown hair, lightened hair
- Heals in a dark brown tone on pale skin

Perfect Brown 4 EB4710

- For dark hair and dark skin tone.
- Heals in an intense brown tone.

Almond Brown EB1610

- Almond brown is a neutral brown pigment with a golden hue and a light brown base.
- Gives the eyebrows a dark blonde color
- Ideal for light blond / blond-haired and red-haired clients
- Always mix with 2 drops of ST0310

Latino Ombre EB1910

- Medium brown with a warm base
- For Latin American and African American skin: Also ideal for Asian skin if you want a lasting effect. Add ST0310 for a more permanent color
- For brunettes with dark skin: Creates warm chestnut color

Coffee Brown EB0910

- Medium brown with warm undertone
- For brunettes with dark skin: Recommended for use with ST0310 for cooling and better durability over time
- For very dark or black skin: Perfect for powder brows

MICROBLADING, HAIRSTROKES & SPM

Coffee Latte MB1010

- Ash blonde color for real blondes to clear skin. It is used pure and gives a very natural result.
- Recommended for light skin
- All our microblading pigments are ultra high viscosity to optimize pigmentation

Cappuccino MB0610

- Cool neutral chestnut brown color
- Recommended for chestnut and ash brown hair with light skin
- Add ST0410 if the color is used on dark cold skin
- All our Microblading pigments have an extra high viscosity to optimize pigmentation

Espresso MB0210

- Deep warm brown color
- Recommended for brown or chestnut dark hair with dark skin
- Don't use it alone, cool it with the ST03.
- Perfect for warming up a cold base and dark like the MB0110.

Americano MB0810

- Brown color with a cool tendency
- Recommended for dark chestnut, brown, reddish and reddish brown hair
- Can be mixed with MB0410 to soften and increase the brown color

Irish Coffee MB0310

- Soft and cool brown color
- Add a little MB0410 to make the color warmer

Chocolate MB0410

- Medium warm brown
- Recommended for clients with dark hair and mixed and Asian skin tones
- Do not use alone, cool it down with ST0310
- Ideal for adding a warm tone to cold pigments

Ristretto MB0110

- Cold brown color - the darkest tone in the entire color chart
- Recommended for brunettes with light skin and dark eyebrows
- Perfect for dark eyebrows in mulatto or asian skin
- Add MB0210 to make the color warmer

LIPS

Glossy Beige LP4410

- Cold beige color
- Natural effect, recommended for contouring and filling

Warm Coral LP0910

- Warm copper / coral color
- Recommended for people with red and light to dark brown hair
- Ideal for mixing with other pigments to add copper shade

American Pink LP5710

- Light pink cool color
- Can be used undiluted on cold lips
- Does not turn blue.

Basic Lip LP2410

- Natural cool rose color
- Recommended for contours on people with red and light brown hair

Apricot Pulp LP4610

- Very natural apricot pink color with a warm undertone
- Perfect for pixel technique to make the lips uniform
- Also ideal for filling without contours

Real Pink LP5910

- Heals as true pink color even though pigment has a warm base
- Creates an intense effect on light lips and a fresh pinky color on medium lips
- Removes cold undertones and creates natural effect on dark lips
- Used for a mild lip contour for women who want an easily visible natural effect

Color Booster BO0010

- Color Booster provides a better and longer pigment retention in the skin
- Only compatible with PMU-line pigments

Pigment Diluter DL0110

- Designed to lighten color without changing color / tint
- Can be used with all PMU-line pigments
- Compatible with PMU-line pigments only

Perfect Lips 1
(LP6210)

Glossy Beige
(LP4410)

American Pink + Real Pink
(LP5910) + (LP5710(

- Absolutely sterile and hygienic
- 5-year shelf life after production (unopened)
- 100% biocompatible and perfectly matched to the skin's natural pH
- Ingredients and all base materials are origin environmentally friendly and vegan

LIPS

Perfect Lips 1 LP6210

- Intense pink with a radiant hue that awakens and enhances the lips of your boldest clients!
- Intense on light lips for a "lipstick" effect
- Softer on medium-toned lips
- Natural look on darker lip tones.

Perfect Lips 2 LP1110

- Pale pink – gives a natural, subtle appearance even on darker mucosa
- Suitable also for male clients seeking a natural aesthetic
- Cold pale pink tone, with cool undertone

Perfect Lips 3 LP4010

- Deep rosewood
- A dark intense mix of medium brown and pink (with a warm undertone)
- Recommended for brown hair and brown skin
- Ideal for full color work for women looking for a natural, visible effect
- Recommended for chestnuts and browns

Perfect Lips 4 LP2310

- For Mediterranean mucous membranes when the customer wants a strong contour
- Tip: Use 2 drops of Color booster

PIGMENT COLOR CHART

MULTIPLE USE STERILE PIGMENT- MANUFACTURED IN MEDICAL LABORATORY IN EU - SINCE 1999

Manufactured in EU in a controlled atmosphere in certified laboratory ISO 9001, EN13485 and GMP, PMU-line pigments are the result of a precise blend of organic and mineral pigments, which are subject to rigorous controls: analysis of heavy metals and aromatic amines. They are in perfect conformity with the recommendations of European legislation, one of the most rigorous in the world. PMU-line pigment is easy to use thanks to an ultra-precise pump and remains sterile between each use. Without preservatives, water or petrochemical products, PMU-line pigments are adapted to the skin's pH.

STABILIZERS

- Add some drops to existing pigment to adjust it to a desired shade

All skin types

Less Grey Brows Drops ST0410

- Stabilizes eyebrow color that tends to be cool
- Recommended for black, dark, Asian and North African skin and eyebrows that already have a cold color
- Longer shelf life of all dark pigments
- 1 drops for 3 drops of pigment eyebrows during the first pigmentation.

Less Red Brows Drops ST0310

- Recommended for redheads and customers with pale skin and for those whose natural eyebrows are already warm
- Secures longer stability of pigments with warm base
- Prevents oxidation of warm pigments so that pigment remains brown without a reddish tinge
- 1 drop for 3 drops of pigment eyebrows during the first pigmentation

CORRECTORS

- Use pure on the healed PMU to correct the pigment
- Add to other pigments if needed

All skin types

Grey to brown cover CC0310

- Grey eyebrow corrector
- The grey is absorbed. The eyebrow becomes chestnut colored
- Immediately after correction, the corrected can be treated
- Correctors should only be used in areas that are already pigmented

Blue to brown cover CC1010

- It is a "Corrector" pigment which neutralizes blue color and treated area gets more brownish tone after healing
- Use it on Eyebrow and Lips
- Immediately after treatment with this corrector the area can be treated with the desired color on top
- "Correctors" should only be used in areas that are already pigmented

EYELINER

Lash line & Eyeshadows

All skin types

True Black TA1310

- Intense black color - the coolest pigments hade in the whole colour chart
- Do not use on eyebrows as it is too cold (use Ristretto MB0110 for darkest hairstrokes effect or Dark Brown EB0810 for darkest ombre effect)
- Perfect for classic narrow or wide eyeliner as well as for pixel liner in all skin types regardless of ethnic background

Dark Melissa EL1610

- Ideal color choice for eyeliner for green, brown, black and brown eyes
- This color will also contrast blue or grey eyes in fair skintones
- One of the best sellers for fair Scandinavian skin
- An amazing olive dark green color that brings expression to dark eyes, highlighting the golden patches of the iris

Indigo Grey EL1510

- Light lavender color
- Eyeliner recommended for green, brown and hazelnut colored eyes such as kohl and pencil effect
- Perfect for smudgy liner technique
- Looks beautiful and elegant on customers with completely grey or white hair
- One of the bestsellers for Scandinavian skin
- We recommend combining all colorful eyeliners with a fine black lash reinforcement

Snow White WH0110

- White color to create highlights, details or blend in other pigments
- Has a warm base and therefore does not change to a grey tone over time
- Recommended for dark skin as eyeliner

MULTIPLE USE STERILE PIGMENT- MANUFACTURED IN MEDICAL LABORATORY IN EU - SINCE 1999

PMU-line pigments are manufactured in the EU in ISO 9001, EN 13485, and GMP-certified laboratories under controlled atmosphere conditions. Formulated from organic and mineral pigments, they are rigorously tested for heavy metals and aromatic amines and fully comply with strict European legislation. An ultra-precise pump ensures accurate dosing and sterility between uses. Free from preservatives, water, and petrochemicals, the pigments are adapted to the skin's natural pH.

100%

- Absolutely sterile and hygienic
- 5-year shelf life after production (unopened)
- 100% biocompatible and perfectly matched to the skin's natural pH
- Produced in the EU in a certified medical laboratory since 1999 in accordance with ISO 9001, EN13485 and GMP
- Ingredients and all base materials are 100% natural origin environmentally friendly and vegan

0%

- 0% preservatives
- 0% latex
- 0% PPD
- 0% petrochemical derivatives
- 0% nanoparticles
- 0% water
- 0% paraben
- Not tested on animals

PRODUCT DETAILS

Perfect dosage and sterility throughout - the pigment comes in an airless bottle which is easy to use thanks to an ultra-precise pump and it remains sterile between treatments.

Safe and fully compliant with relevant legislation. Passes the most stringent testing described in REACH.

Complies with European standards for medical devices CEIIb.

Labelling complies with European legislation on tattoos and permanent make-up products and makes it possible to identify and trace the products.

Produced and packaged using the latest medical technology in clean rooms with a class C and D controlled atmosphere. They are then sterilized by gamma radiation at a dose greater than 25 kGy in accordance with validated industrial applications.

The precise combination of organic and mineral pigments is subjected to strict control and analyzed for heavy metals and aromatic amines.

BENEFITS

1 bottle has a MINIMUM of 40 treatments

Microblading pigments have high viscosity, which optimizes pigmentation.

Amazingly easy to work with and treatments take significantly less time.

Ultra-fast setting and long-lasting results (no need to replenish).

Maximum pigment concentration guarantees long-lasting, stable color.

Developed for all types of pigmentation (PMU, scalp, areola pigmentation, microblading, softap, scar and vitiligo camouflage), PMU-line pigments offer you perfect compatibility with all equipment and treatment techniques.

The color won't shift to red or blue thanks to the "biocoating" of pigment particles.

It won't evaporate or dry out during treatment.

Stable, intense shades for all skin types and ethnicities.

The wide range of shades allows you to offer your clients the perfect custom pigment for their skin type and guarantee them a natural look.
